We've learned that most online stores are **losing sales for the same main reasons:**

- ◆ **Long** time to code and build
- ◆ **Slow** website performance
- ◆ **Poor** personalization

deco is the **digital experience platform**
that brings storefronts to **max performance**

Fast to build

Our framework boosts dev productivity and cuts down on implementation time

Fast to load

90+ scores on PageSpeed, resulting in increased conversion rates

Fast to evolve

Every tool you need to optimize and personalize for each audience

integrates with any commerce platform

deco makes it easy for anyone to create *delightful* experiences

From simple landing pages to Enterprise B2B commerce, build any experience you want with data from any source you need.

- › Load data from any API
- › Serve low-latency sites globally
- › Personalize for each audience

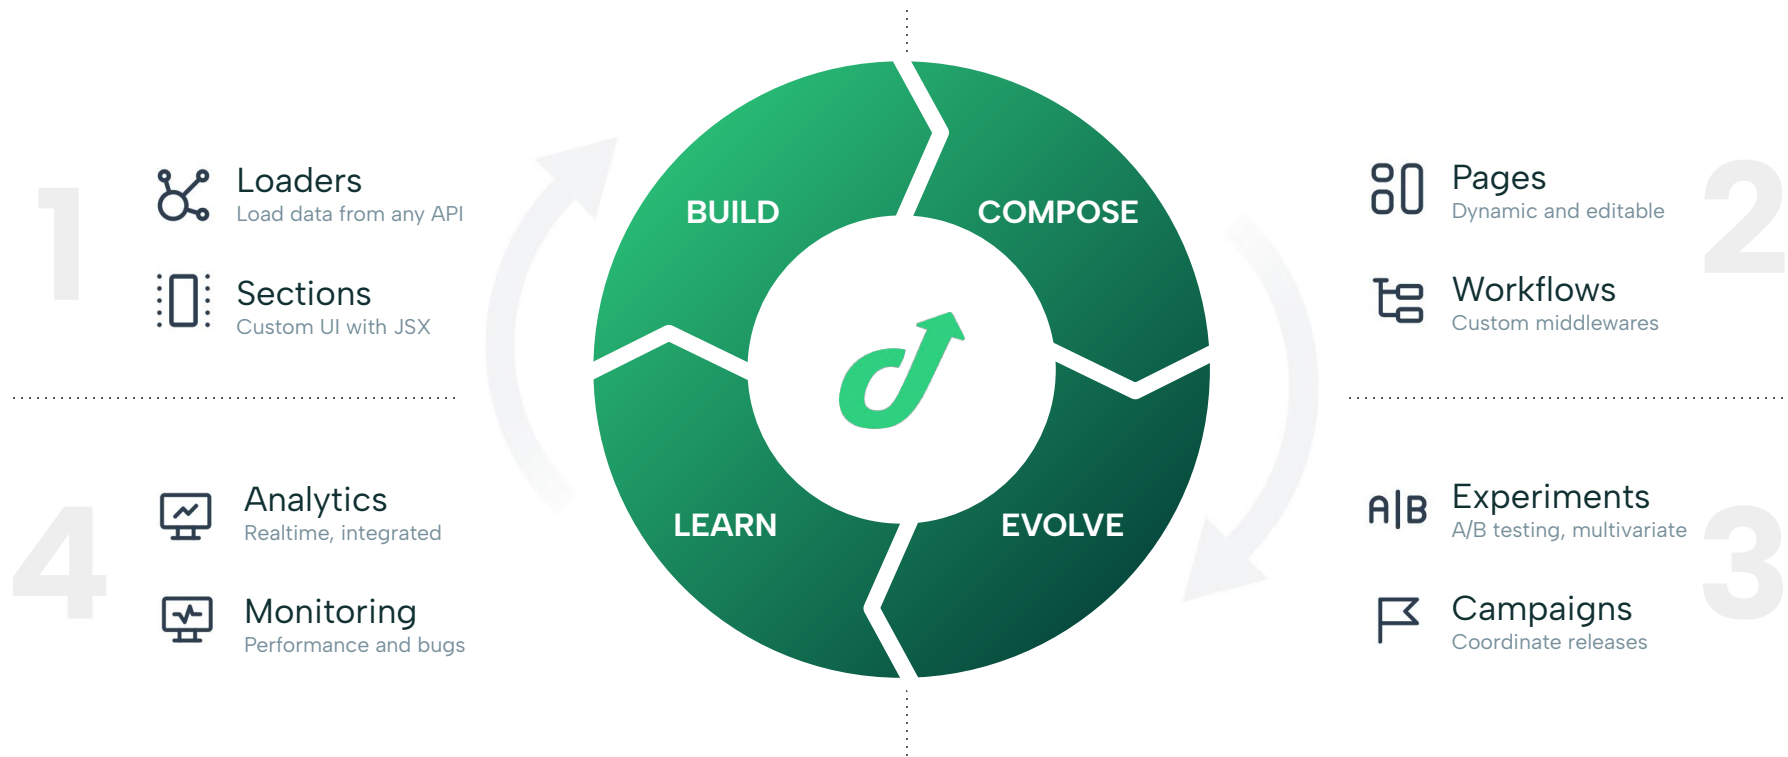

Our open-source, **edge-native** stack enables **high-performance, fully personalized** digital experiences at scale.

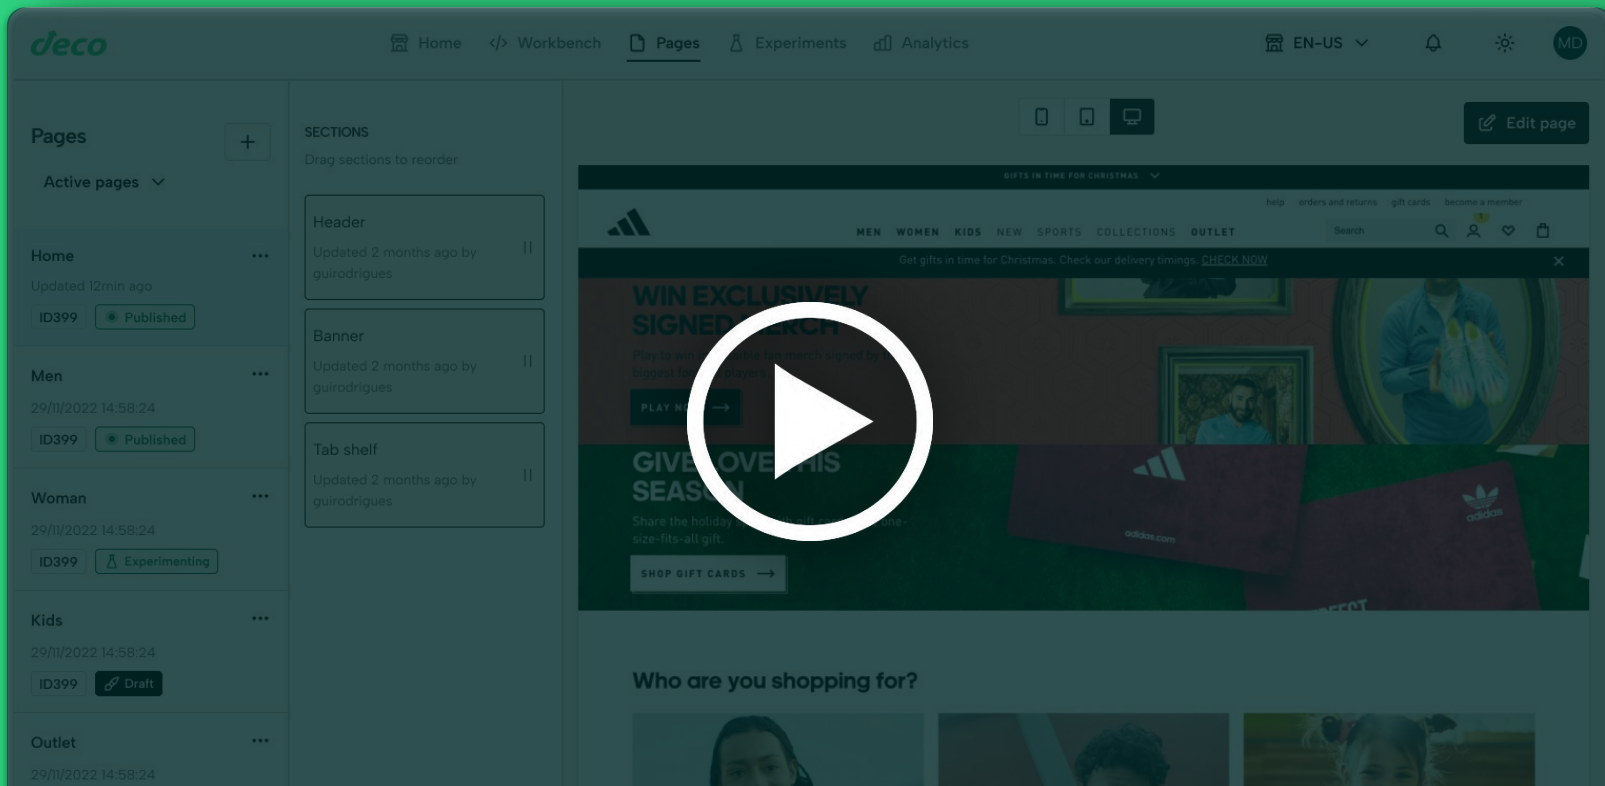

With **34 regions around the globe**, there's always one close your users.

- Focus on developer productivity
- Server-side, zero JS by default
- Instant deploy to the edge
- Realtime extensible feature flags
- Open source to the core

A one-stop-shop platform to **build and optimize** super-fast storefronts with integrated **CMS, A/B Test and Analytics**

Watch a Product Demo

Does **page speed** really matter?

Put simply: **YES!** Slow sites deter visitors, costing businesses millions.
Fast sites have better SEO, better UX, and are **more profitable**.

Every 100ms faster → 1% more conversions

For **Mobify**, every 100ms decrease in homepage load speed worked out to a 1.11% increase in session-based conversion, yielding an average annual revenue increase of nearly \$380,000.

40% faster → 15% more sign-ups

Pinterest reduced perceived wait times by 40% and this increased search engine traffic and sign-ups by 15%.

850ms faster → 7% more conversions

COOK reduced average page load time by 850 milliseconds which increased conversions by 7%, decreased bounce rates by 7%, and increased pages per session by 10%.

50% faster → 12% more sales

When **AutoAnything** reduced page load time by half, they saw a boost of 12% to 13% in sales.

Simple and Lean Operation

You don't need multiple providers to manage your storefront anymore.

deco

is all you need for a complete headless experience — **without the headache.**

Integrations

Headless CMS

Monitoring

Analytics

CDN

A/B Testing

Deploy

deco

Saves on total cost of ownership

+

Simplifies operation, reducing the number of providers

+

Scalable and reliable infrastructure to support your growth

A powerful ecommerce agency ecosystem that **resells our platform** because they get:

- Unified operation

The logo for Deco, featuring the word "deco" in a bold, italicized, sans-serif font. The letter "d" is stylized with a thick vertical stroke and a curved arrow pointing upwards and to the right, integrated into the letter's design.

In 2010's the enterprise challenge was **to sell online**

Before: Unbundled

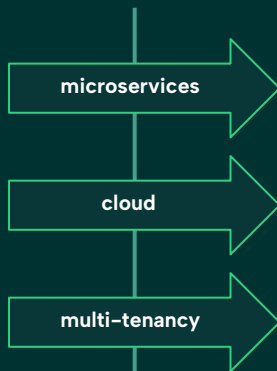

✗ Costly to implement

✗ Complex to build and manage many providers

✗ Scarcity of specialized workforce

technology
breakthroughs

After: Bundled

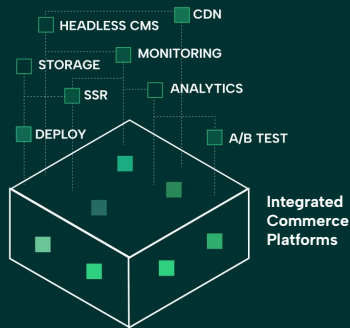

✓ Integrated features

✓ Standardization accelerates distribution

✓ Bundling optimizes costs and reduces risks

Now the challenge is to build outstanding omnichannel experiences

Now: Unbundled Headless

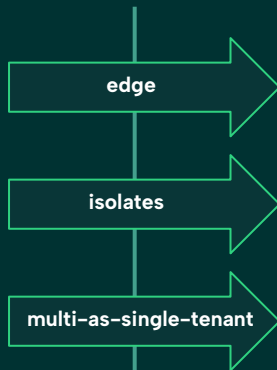

✗ Costly to implement

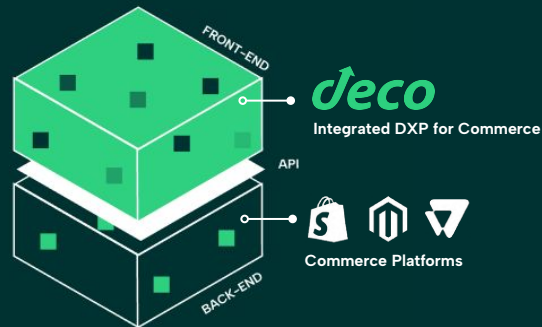

✗ Complex to build and manage many providers

✗ Scarcity of specialized workforce

technology
breakthroughs

With deco.cx: Bundled Headless

✓ Integrated features

✓ Standardization accelerates distribution

✓ Bundling optimizes costs and reduces risks

Competition

							
Open-source	YES	NO	NO	YES	NO	NO	NO
Enterprise-first	YES	YES	NO	NO	NO	YES	NO
Growth Avenue	VTEX	Magento	Shopify	BigCommerce	Commercetools	Big Commerce	Commercetools
Edge-Native	YES	NO	NO	NO	NO	NO	NO

For Developers	VTEX Portal	VTEX IO (Store Framework)	VTEX FastStore	
Developer Experience	Limited server XHTML Client-side JS and CSS	Proprietary JSON framework Fixed React version 16.x	Complex React meta-frameworks	Simple, deno-based, JSX sections and data loaders
Rendering and Data Fetching	US-based server-side navigation	SPA with pre-rendering Proprietary GraphQL	Limited static site generation Proprietary GraphQL	Edge-based, full control on rendering and fetching
Change speed and stability	Manual upload of scripts Refresh takes time	Fast, but error prone due to high complexity dependencies	Slow, requires build on every change, can take over 10m	New code deploys in 3s, realtime content changes
For Business				
Pagespeed Performance	Medium, customizations are client-side only	Low to medium – lots of Javascript sent to browser	High, but heavy JS sent to browser by default	Minimal JS and CSS, server side-rendered close to user
Time to revenue	Medium	Medium	Depends on lots of choices (CMS, deploy, monitoring...)	Fast — full digital experience tooling included out of the box
Ability to innovate	Limited, VTEX-only server-side	Medium, requires learning a proprietary API	High, but focused on VTEX APIs	High, natively multi-platform
Total cost of ownership	Low, VTEX-managed	Low, VTEX-managed	High, requires integration with other products	Lowest — replaces 5+ products with one
Support	Simple, +10 years in the market	Simple, mature Latam ecosystem	Closed beta, mostly enterprise support	24/7 discord community, dedicated senior team
